

CR12™

SIMPLE – INTUITIVE – POWERFUL

Technical Data Sheet

CR12 > SPECIFICATIONS

CR12 is the latest field computer in the CRX display family. This powerful operating system features easy job set-up, fewer touches, and greater efficiencies, empowering the user with extraordinary data management capabilities. Uniquely, the CR12 offers an extensive field planning feature, allowing the user to define AB-lines and reference lines off the field boundary. The user can then setup the complete field, including multiple headlands, and spray tracks with different working widths. Monitor and manually control the implement as provided by the controller (ECU).

FOUR CLEAR MAIN SCREENS

Start-up screen with map based navigation

Easy to use settings page, always easily within reach

Guidance screen with customizable layout

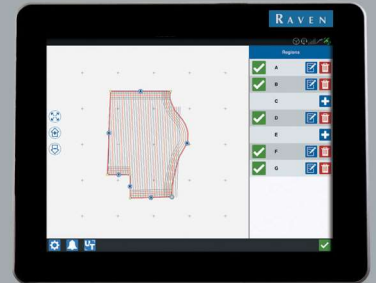

ISOBUS Universal terminal screen with integrated Task Controller

SPECIFICATIONS

- 12.1" capacitive touchscreen
- IP65 (Splash proof)
- 4-35 VDC Input - Reverse polarity protected
- Built-in self test
- 30 GB internal storage
- 802.11 B Wifi
- CE certificates

COMPATIBLE HARDWARE

- 600S
- SC1
- RS1
- RCM
- SmarTrax MD
- Hawkeye
- ISO Sidekick & ICD
- AccuBoom
- AutoBoom XRT
- ISO Product Control
- SCS Control Consoles

BENEFITS & FEATURES:

- Simple, customizable user interface
- ISOBUS Universal Terminal and Task Controller
- Map based navigation
- Scouting functionality
- Operation Planning
- Boundary & guidance line options
- Grower-Farm-Field data structure
- Support for up to 5 product control
- Slingshot® file transfer and Remote Support
- Slingshot® Over the Air Software Updates
- Easy system backup and recovery
- WiFi capable
- Single and Multi VRA available
- Supports eight languages
- DTC listing
